

VIRTUAL D^eNTAL SOLUTIONS

Your one-stop resource for smart solutions

Manage Your Books with the Help of Experienced Professionals

As a busy dental professional, it would help if someone experienced and professional can take care of the non-core aspects of your practice like accounting and bookkeeping. Your time is best spent in looking after your patients' requirements. Handing over your finances to experienced professionals will help save your valuable time, which you can then dedicate to your patients. We can help reduce the amount of time spent on accounting and bookkeeping even more, by integrating your Accounting System with popular softwares like Sage, QuickBooks etc.

Our accounting and bookkeeping staff is expert at managing dental books of accounts. All your documents will be processed within 24-48 hours of receipt, ensuring that your financials are up-to-date at all times. What's more, you save from 30 to 50% of costs associated with hiring and retaining in-house staff. Our services are also completely scalable, so you can select only the services that meet your dental practice's requirements.
